**BATTIPAV**

February 2006

Carriage provided with adjustable ball-bearing for getting a perfect sliding and top precision.

Carriage provided with a compound lever that makes the cutting quick and precise. Antiscratch and interchangeable breaking foot.

The locking device of the goniometric square pulled up allows to find soon the "0 DEGREES" as reference frame making more practical the diagonal cuts.

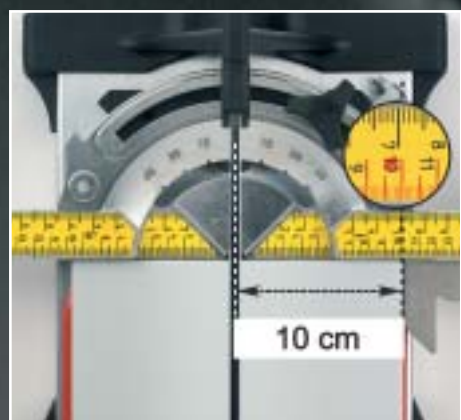

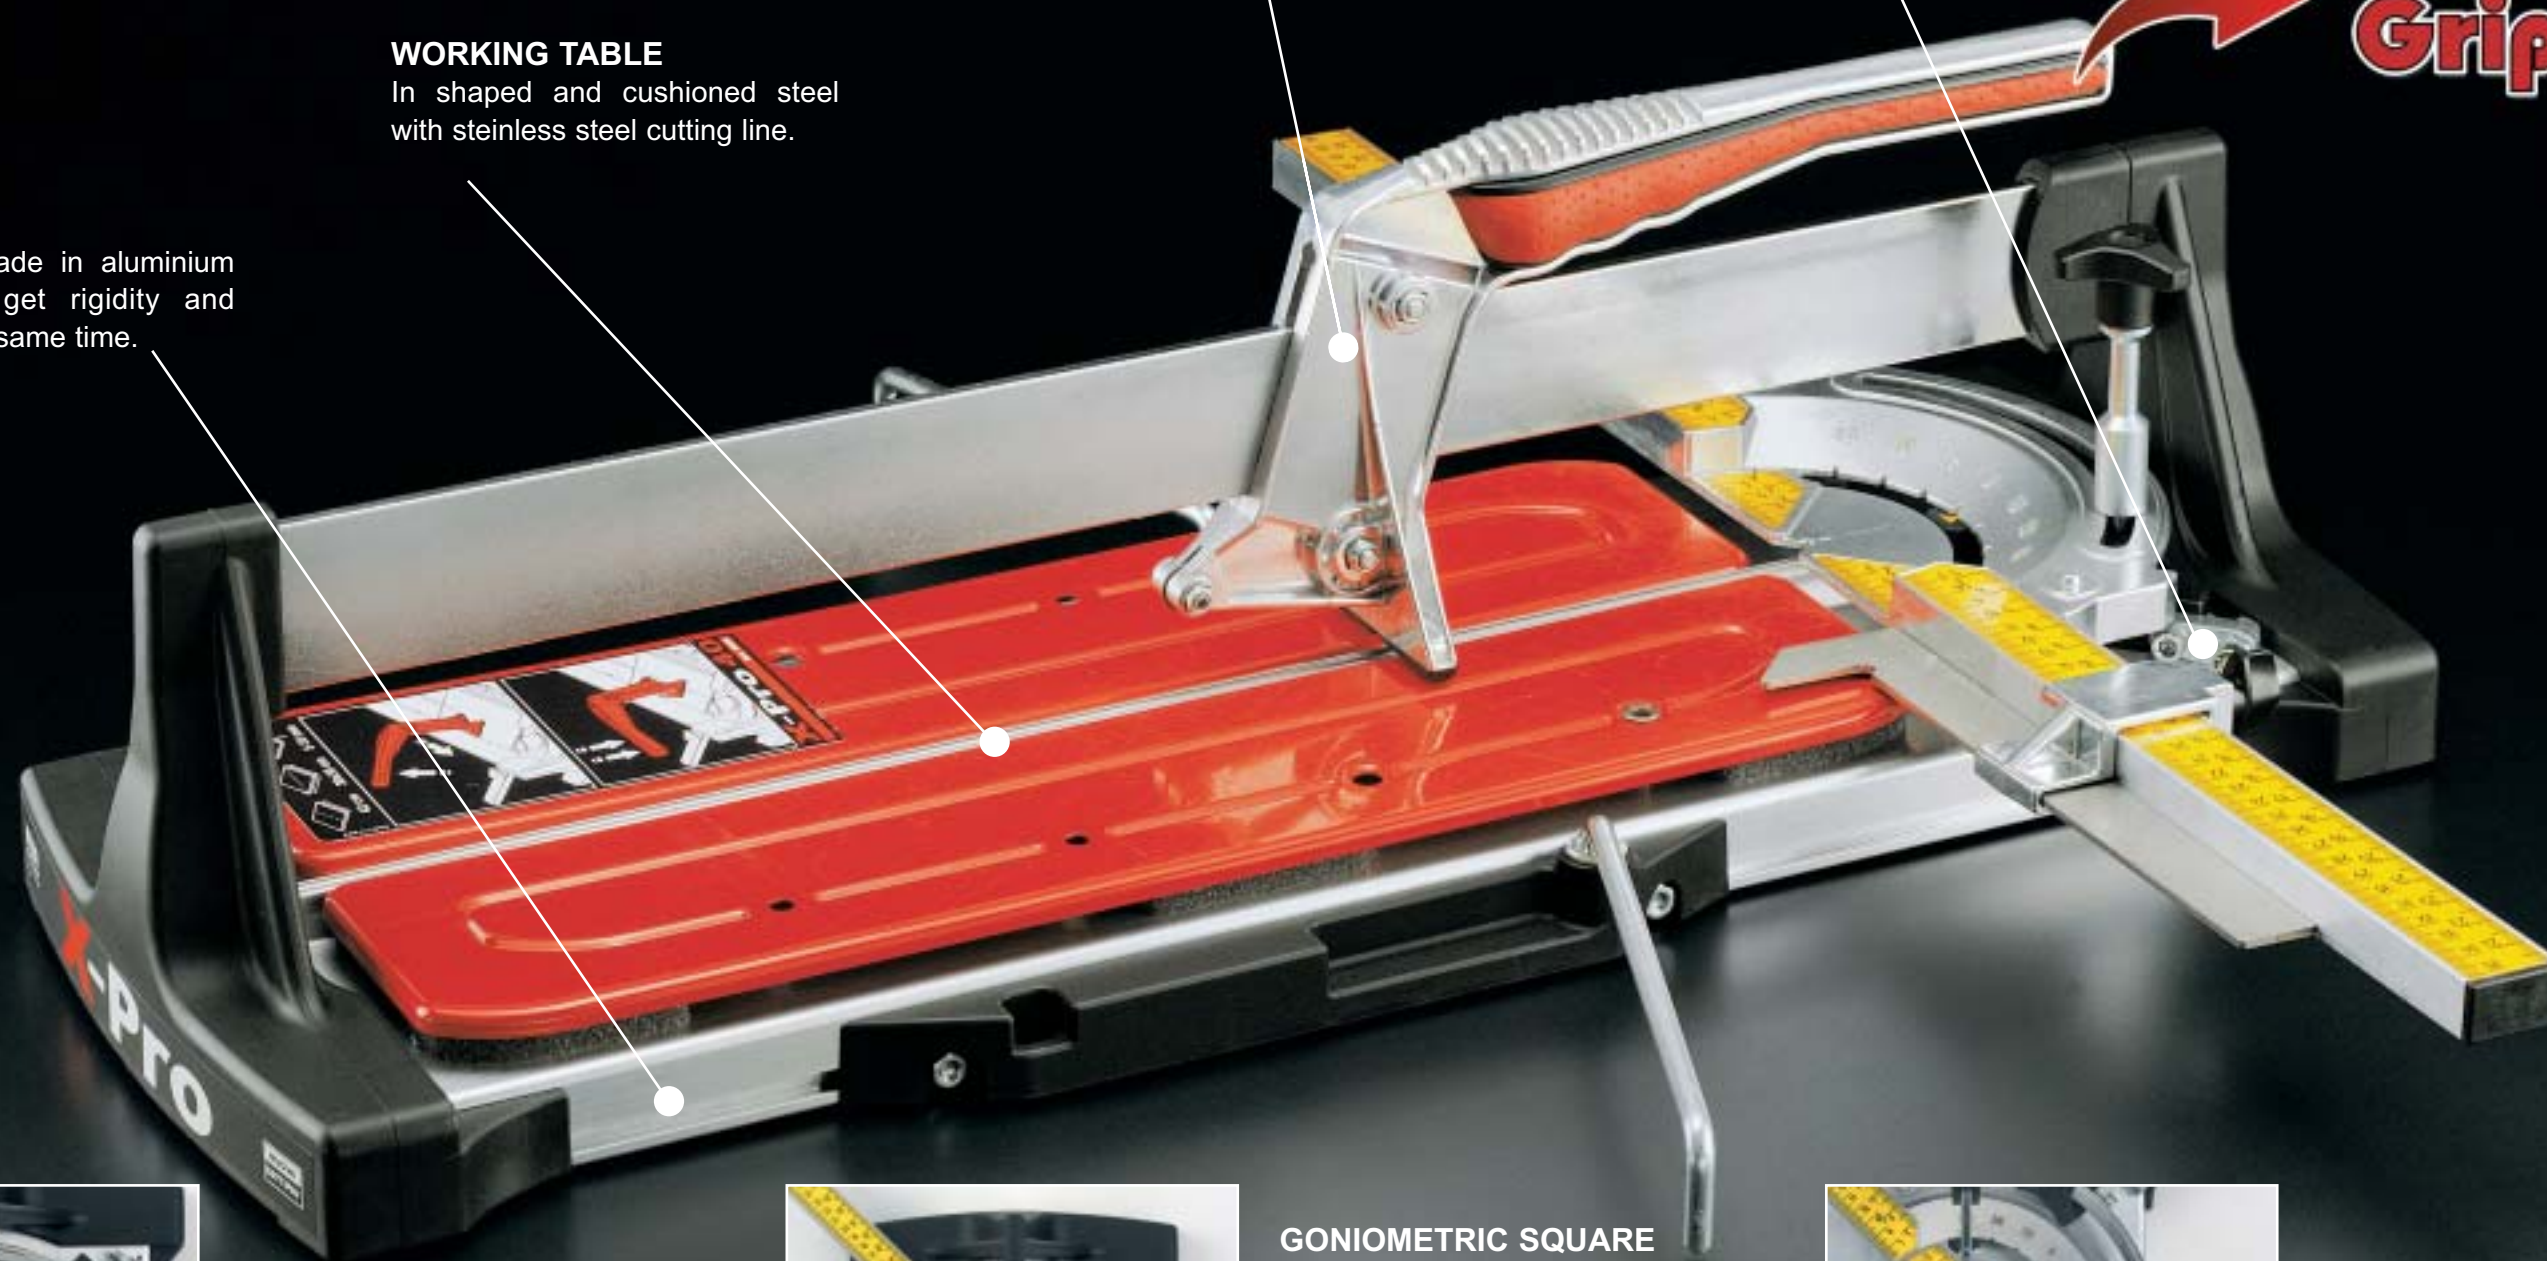

### WORKING TABLE

In shaped and cushioned steel with stainless steel cutting line.

### STRUCTURE

Strong body made in aluminium draw-plate to get rigidity and lightness at the same time.

**Soft Grip**

Goniometric square in "90°" position for a direct reading of the measurement for straight cuts.

### GONIOMETRIC SQUARE

It can be rotated in all the directions: from "-45°" to "0°" to "+45°".

Provided with double metric scale for the direct reading of the measurement of straight and diagonal cuts.

Goniometric square in "45°" position for a direct reading of the measurement for diagonal cuts.
